Summary

Many model railway trees have a very small base with them when purchased.

Tags: model ho trainset modelrailway

Many model railway trees have a very small base with them when purchased. This is my attempt to create a bigger base which means they stand up better and fall over less.

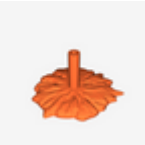

Included a model with 4mm interior hole for trees with larger "trunks".

Also include a blend file.

Print instructions Category: Hobby Instructions

I find print at a low resolution works well (300 micron etc) as the individual extrusions add detail implicitly.
