Summary

Adds some window and door parts not found in Lockwatcher's HO Scale House and Garage.

Toys & Games > Building Toys

Tags: hoscale hotrains house modeltrain train

This project simply adds some additional parts to Lockwatcher's project - https://www.printables.com/model/50660-ho-scale-house-and-garage

I printed them with 0.2mm layer quality settings with PETG. The doors can be printed flat side down with supports added to the frame edges to prevent drooping.
