Summary

A scrap load for 41 foot low side gondolas

Hobby & Makers > Other Ideas

Tags: railroad ho

Remixed size is 143.5 x 31 which is perfect for my Accurail 41 foot gondolas. If that's not quite right for your cars it's quite easy to adjust in Prusa Slicer by simply unlocking the model dimensions and changing X/Y to meet your needs. With a scrap load the relative scales being tweaked makes no difference visually.

This remix is based on

HO Scale Junk Scrap Load
