This is a HOn30 Davenport made to fit a Toma Model Works #6191 power chassis with 7mm wheels and 14mm wheelbase. If you're not up for the challenge of adding he crank rods you can use the "plan B" frame, it has journals like Davenport used. Couplers are Microtrains #1015. Screw the frame to the body with 1mm screws (00-90 will also work).
