Rerailer tool for Märklin H0. Makes it easy to place multi-axle wagons and locomotives on the track. Prints without supports.

- Put the rerailer on the track. It fits all types of track (M, K, and C) and has a tab on the bottom to prevent it from sliding.
- Put the wagon or locomotive on the rerailer and slide it down onto the track.
- The wheels are guided, first from the outside and then from the inside, until they are perfectly aligned to the rails.
