Summary

"STACK" Stellwerk - remix gauge 1 (1:32)

World & Scans > Architecture & Urbanism

"geniv" published the nice looking "Stack" signal box in TT-scale (1:100).

I've remixed it to be close to gauge 1 (1:32) by scaling it up 375%. All parts have to fit the print-bed of a CR10.

To make printing quicker some adjustments were made (i.e. thinner walls).

13 December 2021: Re-uploaded stl's based on posted comments.

Printer Brand:

Creality

Printer:

CR-10

Rafts:

No

Supports:

No

Resolution:

.25

Infill:

25%

Filament: 123-3D.nl PETG Black Post-Printing ==========

Paint the walls in the desired colors and glue the section together with an appropriate glue.

To avoid toppling over, I've put a brick in the ground floor section.
