Summary

A very basic 4% grade to place under your HO track to create an incline.

Hobby & Makers > RC & Robotics

A very basic 4% grade to place under your HO track to create an incline.

This design is about as basic as it gets

Print instructions

Tested between .15 and .3 printing.

Recommend %5 rectangular infill.

I would avoid 0 bottom layer option, as the print is very likely to fail (detach from base plate) unless a large brim is included.

Send me a message if you want any changes to this basic design.
