Info ::
This was a request from Koppa to (re-)create a model of the Mosby stasjon in Norway.

We give this project to the rest of the world to use for any (non-commercial) goals.

The design include optional floors and 4mm led holes for individual room lighting. The design also has wiring holes at the top of every room and can be directed downwards through the chimney.

Please share your creations as I love to see them =^.^=

Full 3D files (Fusion/STEP) can be downloaded on my site :
www. yet to come ...

Print instructions

The station is rather small, detailed and is best printed with a 0,25mm nozzle (or smaller) or a SLA printer.

There is a g-code file with it for a Prusa with 0.25mm nozzle with some custom settings to help with support as the print should be printed with support on any FDM printer.
