Print instructions

This model can be printed with the MSLA technology. Generate supports manually to ensure its proper position. Support all the overhang parts, use 0,3mm support head diameter for tiny parts. The windows should be printed with a clear resin using no supports and pad. Place the windows flat side down to the printer platform.
The wheels should be printed perpendicular to the surface to make them as round as possible.
Print the model with 0,025mm layers to get the best results.
